AERODROME

S11 NORTH MARA – HTXX

A new excavated rock dumping site has been demarcated. This area of the rock dump is 50M from the edge of the runway located along the entire length of the runway on the northern side (Left hand side of RWY 11; Right hand side of RWY 29). The dump will slope northward in a slope of 25% and will gradually and ultimately reach a maximum height of approximately 250 feet AGL in approximately 1 year.

Pilots should exercise caution on operating at the aerodrome as there is a temporary movement of heavy vehicles in the vicinity of the proposed area as ground preparations are in progress to create the dump.

Pilots shall broadcast on frequency 118.2 MHz when in range or before departure for essential aerodrome information.

(REF: AIP AD 1.3-15).
