

# THE CIVIL AVIATION (AIRWORTHINESS) REGULATIONS, 2011

## ARRANGEMENT OF REGULATIONS

### PART I PRELIMINARY PROVISIONS

<i>Regulation</i>	<i>Title</i>
-------------------	--------------

- |    |                 |
|----|-----------------|
| 1. | Citation.       |
| 2. | Interpretation. |
| 3. | Application.    |

### PART II AIRCRAFT AND COMPONENT ORIGINAL CERTIFICATION AND SUPPLEMENTAL TYPE CERTIFICATES

- |    |  |
|----|--|
| 4. | Acceptance of type certificate.        |
| 5. | Acceptance of production.              |
| 6. | Issue of supplemental type certificate |

### PART III CERTIFICATES OF AIRWORTHINESS

- |     |  |
|-----|--|
| 7.  | Application for certificate of airworthiness.      |
| 8.  | Certificate of airworthiness to be in force.       |
| 9.  | Classifications of certificates of airworthiness.  |
| 10. | Amendment of certificates of airworthiness.        |
| 11. | Surrender of certificate of airworthiness.         |
| 12. | Validity of a Certificate of airworthiness.        |
| 13. | Aircraft identification.                           |
| 14. | Issue of certificates of airworthiness.            |
| 15. | Airworthiness directives and service bulletins.    |
| 16. | Issue of restricted certificates of airworthiness. |

17. Issue of special flight permits.
18. Export Certificate of Airworthiness
19. Conditions on the special flight permit.
20. Certificate of fitness for flight.

PART IV  
CONTINUING AIRWORTHINESS OF AIRCRAFT AND  
AIRCRAFT COMPONENTS

21. Responsibility for maintenance.
22. Continuing airworthiness information.
23. Responsibilities of State of Registry in respect of continuing airworthiness
24. Compliance with the manufacturer's instructions.
25. Reporting of failures, malfunctions, and defects.

PART V  
AIRCRAFT MAINTENANCE AND INSPECTION

26. Persons authorised to perform maintenance, preventive maintenance and modification.
27. Personnel authorised to approve for return to service.
28. Persons authorised to perform inspections.
29. Preventive maintenance limitations.
30. Performance rules maintenance.
31. Performance rules inspection.
32. Airworthiness limitation performance rules.
33. Aircraft mass schedule.

PART VI  
AIRCRAFT NOISE CERTIFICATION

34. Requirements of noise certification
35. Issue, suspension revocation of aircraft noise certificate

PART VII  
MAINTENANCE RECORDS AND ENTRIES

- 36. Keeping of certificate of release to service records.
- 37. Technical logbook.
- 38. Aircraft, engine and propeller log books.
- 39. Records of maintenance.
- 40. Records of overhaul and rebuilding.
- 41. Approval for return to service.
- 42. Content, form, and disposition of records for inspections.
- 43. Damage to aircraft.

PART VIII  
GENERAL PROVISIONS

- 44. Possession of licence, certificate or authorisation
- 45. Inspection of licences, certificates and authorisation.
- 46. Change of address.
- 47. Replacement of documents
- 48. Suspension and Revocations of certificates.
- 49. Use and retention of certificates and records.
- 50. Reports of violation.
- 51. Enforcement of directions.
- 52. Aeronautical user fees.
- 53. Application of regulations to Government and visiting forces, etc.
- 54. Extra-territorial application of Regulations.

PART IX  
OFFENCES AND PENALTIES

- 55. Contravention of Regulations.

PART X  
TRANSITION, SAVINGS AND REPEAL

- 56. Transition, Savings and Revocation.

GOVERNMENT NOTICE NO.....published.....

THE CIVIL AVIATION ACT  
(CAP. 80)

**REGULATIONS**

(Made under Section 4)

THE CIVIL AVIATION (AIRWORTHINESS) REGULATIONS, 2011  
PART I  
PRELIMINARY PROVISIONS

Citation.                    1. These Regulations may be cited as the Civil Aviation  
(Airworthiness) Regulations, 2011.

Interpretation            2. In these Regulations, unless the context otherwise requires-  
“aeronautical product” means any aircraft, aircraft engine, propeller or  
subassembly, appliance, material, part, or component to be installed  
thereon;  
“aeroplane” means a power-driven heavier-than-air aircraft, deriving its  
lift in flight chiefly from aerodynamic reactions on surfaces which  
remain fixed under given conditions of flight;  
“acceptable” means the Authority which review the method, procedure, or  
policy and has neither objected to nor approved its proposed use or  
implementation;  
“aircraft” means any machine derives support in the atmosphere from the  
reactions of the air other than the reactions of the air against the  
earth’s surface;  
“aircraft component” means any component part of an aircraft up to and  
including a complete engine or any operational or emergency

- equipment;
- “aircraft type” means all aircraft of the same basic design;
- “airframe” means the fuselage, booms, nacelles, cowlings, fairings, airfoil surfaces including rotors but excluding propellers and rotating airfoils of a engine, and landing gear of an aircraft and their accessories and controls;
- “airworthy” means an aircraft or aeronautical product which is in fit and safe state for flight and is in conformity with its type design;
- “appliance” means any instrument, mechanism, equipment, part, apparatus, appurtenance, or accessory, including communications equipment, used or intended to be used in operating or controlling an aircraft in flight, installed in or attached to the aircraft, and is not part of an airframe, engine or propeller;
- “approved by the Authority” means approved by the Authority directly or in accordance with a procedure approved by the Authority;
- “approved maintenance programme” means a maintenance programme approved by the State of Registry;
- approved data” means technical information approved by the Authority;
- “approved maintenance organisation (AMO)” means an organisation approved to perform specific aircraft maintenance activities by the Authority ;
- “article” means any item, including but not limited to, an aircraft, airframe, aircraft engine, propeller, appliance, accessory, assembly, subassembly, system, subsystem, component, unit, product, or part;
- “Authority” means the Tanzania Civil Aviation Authority;
- “balloon” means a non-power-driven lighter-than-air aircraft;
- “calendar day” means the period of elapsed time using Co-ordinated Universal Time or local time, that begins at midnight and ends 24 hours later in the next midnight;
- “certificate of release to service” means a document containing a certification that inspection and maintenance work has been performed satisfactorily in accordance with the methods prescribed by the Authority;
- “dry lease” means a lease of an aircraft without crew;

- “engine” means a unit used or intended to be used for aircraft propulsion, and it is consisting of at least those components and equipment necessary for functioning and control, but excludes the propeller if applicable;
- “facility” means a physical plant, including land, buildings, and equipment, which provide the means for the performance of maintenance, preventive maintenance, or modifications of any article;
- “flight time aeroplanes” means the total time from the moment an aeroplane first moves for the purpose of taking off until the moment it comes to rest at the end of the flight;
- “ flight time helicopters” means the total time from the moment the helicopter blades start turning until the moment the helicopter finally comes to rest at the end of the flight and the rotorblades are stopped;
- “glider” means a non-power-driven heavier-than-air aircraft, deriving its lift in flight chiefly from aerodynamic reactions on surfaces, which remain fixed under given conditions of flight;
- “heavier-than-air aircraft” means any aircraft deriving its lift in flight chiefly from aerodynamic forces;
- “helicopter” means a heavier-than-air aircraft supported in flight chiefly by the reactions of the air on one or more power-driven rotors on substantially vertical axis;
- “inspection” means the examination of an aircraft or aircraft component to establish conformity with a standard approved by the Authority;
- “maintenance” means tasks required to ensure the continued airworthiness of an aircraft or aircraft component including any one or combination of overhaul, repair, inspection, replacement, modification, and defect rectification;
- “Maintenance Control Manual” means a manual containing procedures, instructions and guidance for use by maintenance and concerned operational personnel in the execution of their duties;
- “maintenance programme” means a document which describes the specific scheduled maintenance tasks and their frequency of completion and related procedures, such as a reliability

- programme, necessary for the safe operation of those aircraft to which it applies;
- “major modification” means a type design change not listed in the aircraft, aircraft engine, or propeller specifications that might appreciably affect the mass and balance limits, structural strength, performance, power plant operation, flight characteristics, or other qualities affecting airworthiness or environmental characteristics, or that embodied in the product according to non-standard practices;
- “major repair” means a repair of an aeronautical product that might appreciably affect the structural strength, performance, power plant, operation flight characteristics or other qualities affecting airworthiness or environmental characteristics or that will be embodied in the product using non-standard practices
- “modification” means a change to the type design of an aircraft or aeronautical product which is not a repair;
- “overhaul” means the restoration of an aircraft or aircraft component using methods, techniques and practices acceptable to the Authority, including disassembly, cleaning and inspection as permitted, repair as necessary, and reassembly and testing in accordance with approved standards and technical data, or in accordance with current standards and technical data acceptable to the Authority, which have been developed and documented by the State of Design, holder of the type certificate, supplemental type certificate, or a material, part, process, or appliance approval under Parts Manufacturing Authorisation (PMA) or Technical Standard Order (TSO);
- “prescribed” means the Authority has issued written policy or methodology which imposes either a mandatory requirement, if the written policy or methodology states “shall,” or a discretionary requirement if the written policy or methodology states “may.”
- “preventive maintenance” means simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations;
- “propeller” means a device for propelling an aircraft that has blades on an

- engine driven shaft and that when rotated, produces by its action on the air, a thrust approximately perpendicular to its plane of rotation and it includes control components normally supplied by its manufacturer, but does not include main and auxiliary rotors or rotating airfoils of engine;
- “rating” means an authorisation entered on or associated with a license or certificate and forming part thereof, stating special conditions, privileges or limitations pertaining to such license or certificate;
- “rebuild” means the restoration of an aircraft or aircraft component by using methods, techniques, and practices acceptable to the Authority, when it has been disassembled, cleaned, inspected as permitted, repaired as necessary, reassembled, and tested to the same tolerances and limits as a new item, using either new parts or used parts that conform to new part tolerances and limits;
- “repair” means restoration of an aeronautical product to an airworthy condition and to ensure that the aircraft continues to comply with the design aspects of the airworthiness requirements used for the issue of a type certificate for that aircraft type after the aircraft has been damaged or subjected to wear;
- “signature” means an individual’s unique identification used as a means of authenticating any record entry or a maintenance record and may be hand-written, electronic or any other form acceptable to the Authority;
- “specific operating provisions” means a document describing the ratings, Class or Limited, in detail and containing or referencing material and process specifications used in performing repair work, along with any limitations applied to the approved maintenance organisation;
- “standard” means an object, artefact, tool, test equipment, system or experiment that stores, embodies, or otherwise provides a physical quantity which serves as the basis for measurement of the quantity it also includes a document describing the operations and processes performed in order for a particular end to be achieved;
- “State of Design” means a Contracting State which approved the original type certificate and any subsequent supplemental type certificates

for an aircraft, or which approved the design of an aeronautical product or appliance;

“State of Manufacture” means a Contracting State under whose authority an aircraft was assembled, approved for compliance with the type certificate and all extant supplemental type certificates, test flown and approved for operation and it may or may not be the state of design; and

“State of Registry” means a Contracting State on whose registry an aircraft is entered;

Application

3. These Regulations shall apply to all persons operating or maintaining the-

- (a) United Republic of Tanzania registered aircraft, wherever operated;
- (b) aircraft registered in another Contracting State operated by a person licensed in the United Republic of Tanzania, and shall be maintained in accordance with the standards of the aircraft State of Registry, wherever that maintenance is performed; and
- (c) aircraft of other Contracting States operating in the United Republic of Tanzania.

## PART II

### AIRCRAFT AND COMPONENT ORIGINAL CERTIFICATION AND SUPPLEMENTAL TYPE CERTIFICATES

Acceptance of type certificate

4.-(1) The Authority may accept a type certificate or equivalent document issued by a state of design in respect of an aircraft or aircraft component if-

- (a) the type certificate or equivalent document is issued based on an airworthiness code recognised by the Authority; or
- (b) the design, materials, construction equipment, performance and maintenance of aircraft or aircraft component technical evaluation against a recognised airworthiness code is carried out by the Authority and is found to-
  - (i) meet the required standards of the recognised

- airworthiness code; or
- (ii) comply with any recommendations required by the Authority.

(2) Upon acceptance of the type certificate by the Authority, the Authority may, prior to issue a certificate of airworthiness or restricted certificate of airworthiness, require the applicant to comply with any additional requirements as prescribed by the Authority.

(3) For purpose of this regulation, “recognised airworthiness code” means standards relating to the design, materials, construction equipment, performance and maintenance of aircraft or aircraft component issued by the States of Design and accepted and prescribed by the Authority.

Acceptance of production

**5.** The Authority shall only accept application for production of aircraft or aircraft component if the Authority is satisfied that-

- (a) the work to be undertaken conforms to specified design as approved by the State of Design;
- (b) there is in place a suitable arrangement with the holder of a type certificate which ensures satisfactory co-ordination between production and design; and
- (c) there is acceptable arrangements for oversight by the State of Design.

Issue of supplemental type certificate

**6.-(1)** A person who alters a product by introducing a major modification in type design, not great enough to require a new application for a type certificate shall apply for a supplemental type certificate to the regulatory agency of the State of Design that approved the type certificate for that product, or to the State of Registry of the aircraft.

(2) An application for the supplemental type certificate shall be made in a form and manner prescribed by the Authority.

### PART III

#### CERTIFICATES OF AIRWORTHINESS

Application of

**7.-(1)** An owner of an aircraft registered in the United Republic of

certificate of  
airworthiness

Tanzania or agent of the owner may apply to the Authority for issue of a certificate of airworthiness for that aircraft.

(2) An applicant for a certificate of airworthiness shall apply on a form prescribed by the Authority.

Certificate of  
airworthiness  
to be in force

**8.**-(1) A person shall not fly an aircraft unless there is in force in respect of that aircraft a certificate of airworthiness or restricted certificate of airworthiness or a special flight permit duly issued or rendered valid under the law of the State of Registry and any condition subject to which the certificate is issued or rendered valid is complied with.

Classifications  
of certificates  
of  
airworthiness

**9.** The certificates of airworthiness shall be classified as follows-

- (a) a certificate of airworthiness;
- (b) a restricted certificate of airworthiness in the form of a restricted certificate;
- (c) a special flight permit; and
- (d) export certificate of airworthiness.

Amendment of  
certificates of  
airworthiness

**10.** The Authority may amend or modify any type of certificate of airworthiness issued under these Regulations upon application by an operator or the Authority's own initiative.

Surrender of  
certificate of  
airworthiness

**11.** An owner of an aircraft who sells the aircraft shall surrender the certificate of airworthiness or restricted certificate of airworthiness or special flight permit, as applicable-

- (a) to the buyer upon sale of the aircraft within the United Republic of Tanzania; or
- (b) to the Authority in the case of an aircraft sold outside the United Republic of Tanzania.

Validity and  
renewal of a

**12.**-(1) A certificate of airworthiness or restricted certificate of

Certificate of  
airworthiness

airworthiness issued under these Regulations is valid for twelve months from the date of issue unless-

- (a) a shorter period is specified by the Authority;
- (b) the Authority amends, extends, suspends, revokes or otherwise terminates the certificate; and
- (c) the aircraft owner or operator surrenders the certificate to the Authority;

(2) A special flight permit shall be valid for a period specified in the permit.

(3) A certificate of airworthiness or restricted certificate of airworthiness issued in respect of an aircraft shall cease to be in force if-

- (a) the aircraft or its equipment as is necessary for the airworthiness of the aircraft is maintained or if any part of the aircraft or such equipment is removed or replaced, otherwise and with material of a type approved by the Authority either generally or in relation to a class of aircraft or to the particular aircraft;
- (b) the aircraft or any of its equipment is not maintained as required by the maintenance programme or schedule approved by the Authority in relation to that aircraft;
- (c) an inspection or modification classified as mandatory by the Authority applicable to the aircraft or of any such equipment as aforesaid, has not, been completed to the satisfaction of the Authority; or
- (d) the aircraft or any such equipment as aforementioned sustains damage and the damage is ascertained during inspection which affects the airworthiness of the aircraft.

(4) An application for renewal of a certificate of airworthiness shall be made in a form prescribed by the Authority not later than sixty days before the certificate expires.

Aircraft  
identification

**13.** An applicant for a certificate of airworthiness or a restricted certificate of airworthiness or special flight permit shall show that the aircraft is properly registered and marked has identification plates affixed to the aircraft.

Issue of  
certificates of  
airworthiness

**14.-(1)** A certificate of airworthiness shall be issued for aircraft in the specific category and model designated by the state of design in the type certificate.

(2) The Authority shall issue a certificate of airworthiness if-

- (a) the applicant presents evidence to the Authority that the aircraft conforms to a type design approved under a type certificate or a supplemental type certificate and to the applicable airworthiness directives of the state of manufacture or design;
- (b) the aircraft has been inspected in accordance with the performance rules of these Regulations and found airworthy by persons authorised by the Authority to make such determinations within the last thirty days;
- (c) the Authority finds, after an inspection, that the aircraft conforms to type design and condition for safe operation;
- (d) the aircraft when operated in accordance with the requirements specified in the flight manual or equivalent document for the aircraft conforms to the approved type specifications specified in the approved type certificate or equivalent document;
- (e) the maintenance determined by the Authority as a prerequisite for issue of a certificate of airworthiness is carried out and certified by a person acceptable to the Authority in accordance with these Regulations; and
- (f) the results of flying trials, and such other tests of the aircraft as the Authority may require, are complied with.

(3) The Authority may issue a certificate of airworthiness subject to such other conditions relating to the airworthiness of the aircraft as the

Authority thinks fit.

(4) A certificate of airworthiness shall specify one of the following categories as are, in the opinion of the Authority, appropriate to the aircraft operation-

- (a) commercial air transport (passenger);
- (b) commercial air transport (cargo);
- (c) general aviation; or
- (d) aerial work.

(5) Certificate of airworthiness shall be issued subject to the condition that the aircraft shall be flown only for the following purposes-

- (a) commercial air transport (passenger): any purpose;
- (b) commercial air transport (cargo): any purpose other than commercial air transport of passengers;
- (c) aerial work: any purpose other than commercial air transport or general aviation;
- (d) general aviation: any purpose other than commercial air transport or aerial work;

(6) The Authority may in the process of issuing a certificate of airworthiness demand that reports be furnished by a person qualified to furnish such reports.

Airworthiness  
directives and  
service  
bulletins

**15.-(1)** A person shall not operate an aircraft or aircraft components to which an airworthiness directive applies except in accordance with the requirements of airworthiness directive.

(2) Upon registration of an aircraft in the United Republic of Tanzania, the Authority shall notify the State of Design of the registration of the aircraft in the United Republic of Tanzania, and request that the Authority shall receive all airworthiness directives addressing that aircraft, airframe, aircraft engine, propeller, appliance or component.

(3) Where the State of Design considers that a condition in an aircraft, airframe, engine, propeller, appliance or component is unsafe as shown by the issue of an airworthiness directive by that State, such directives shall apply to the United Republic of Tanzania registered aircraft of the type identified in that airworthiness directive.

(4) Where a manufacturer identifies a service bulletin as mandatory,

such bulletin shall apply to the United Republic of Tanzania registered aircraft of the type identified in that bulletin.

(5) The Authority may identify manufacturer's service bulletins and other sources of data or develop and prescribe inspections, procedures and limitations for mandatory compliance pertaining to affected aircraft in the United Republic of Tanzania.

(6) A person shall not operate in any of the United Republic of Tanzania registered aircraft to which the measures of this regulation apply, except in accordance with the applicable directives and bulletins.

Issue of restricted certificates of airworthiness

**16.**-(1) The Authority may issue a restricted certificate of airworthiness to the aircraft not qualify for a certificate of airworthiness including microlight, experimental amateur and kit built aircraft, an aircraft used for air races, aircraft flying for exhibition purpose and a kite.

(2) An aircraft holding a restricted certificate of airworthiness shall be subjected to operating limitations within the United Republic of Tanzania and shall not make international flights.

(3) The Authority shall issue specific operating limitations for each restricted certificate of airworthiness.

Issue of special flight permits

**17.** The Authority may issue a special flight permit for an aircraft which is capable of safe flight but unable to meet applicable airworthiness requirements for the purpose of-

- (a) flying to a base where weighing, painting, repairs, modifications, maintenance, or inspections are to be performed or to a point of storage;
- (b) flying for the purpose of experimenting with or testing the aircraft including its engines and equipment;
- (c) flying for the purpose of qualifying for issuing, renewal or validation of certificate of airworthiness or restricted certificate of airworthiness and approval of a modification of the aircraft;
- (d) delivering or exporting the aircraft;
- (e) evacuating aircraft from areas of impending danger; and
- (f) operating at mass in excess of the aircraft's maximum certified

takeoff mass for flight beyond normal range over water or land areas where adequate landing facilities or appropriate fuel are unavailable with the excess mass limited to additional fuel, fuel-carrying facilities, and navigation equipment necessary for the flight.

Export  
certificate of  
airworthiness

**18.-(1)** An owner of an aircraft registered in the United Republic of Tanzania or an agent of the owner may apply to the Authority an export certificate of airworthiness for aeronautical products.

(2) An application for an export certificate of airworthiness shall be in a form prescribed by the Authority at least fourteen days before the intended date of export of the aircraft out of the United Republic of Tanzania.

(3) The Authority shall issue an export certificate of airworthiness if-

- (a) the applicant submits a statement of compliance with the full intents of the approved maintenance programme or schedule;
- (b) the applicant submits a statement of compliance with the mandatory airworthiness directives and service bulletins applicable to the aircraft and its equipment;
- (c) the aircraft has been inspected in accordance with the performance rules of these regulations and found airworthy by persons authorised by the Authority to make such determination within the last fourteen days;
- (d) the maintenance determined by the Authority as a prerequisite for issue of the export certificate of airworthiness has been carried out and certified by a person acceptable to the Authority in accordance with these regulations;
- (e) the result of test flight, and other tests as the Authority may determine are complied with;
- (f) historical records establishing the production, modification and maintenance standard of the aircraft are attained; or
- (g) a weight and balance report with a loading schedule, where applicable, for each aircraft in accordance with the applicable regulations is furnished to the Authority.

(4) The export certificate of airworthiness shall not be used for the purpose of flight but for confirmation of recent satisfactory review of the airworthiness status of the aircraft.

(5) Any extension or variations granted to an aircraft in accordance to an approved maintenance programme or schedule shall be automatically revoked before issue of the export certificate of airworthiness.

Conditions on  
the special  
flight permit

**19.**-(1) A person shall not fly an aircraft on a special flight permit unless that person complies with conditions of this Regulation.

(2) A person who flies an aircraft on a special flight permit referred to under Regulation 17 shall ensure that-

- (a) the flight is made under the supervision of a person approved by the Authority for such flight, subject to any additional conditions which may be specified in the permit;
- (b) a copy of the permit is carried on board the aircraft at all times when the aircraft is operating under the conditions of the permit;
- (c) operating under the conditions of the permit;
- (d) the aircraft registration markings assigned to the aircraft are displayed;
- (e) no person or property is carried on board for hire or reward;
- (f) only persons essential for the safe operation of the aircraft is carried on the aircraft and the person shall be advised of the contents of the permit;
- (g) the aircraft is operated only by flight crew holding appropriate licence with sufficient experience to appreciate the reasons for the aircraft non-compliance to the prescribed airworthiness standards;
- (h) the flight is conducted in accordance with applicable flight operating rules and procedures of the states of the intended routing;
- (i) the routing is such that areas of heavy air traffic, areas of heavy human concentration of a city, town settlement or any other areas where the flight might create hazardous exposure

to person or property is avoided;

- (j) the flight is performed in accordance to the performance limitations prescribed in the aircraft flight manual and any other limitation that the Authority may impose on such flight;
- (k) all flights are conducted prior to the expiry date of the special flight permit or at any other time the Authority declares so in writing; and
- (l) the aircraft shall not depart for the flight on a special flight permit unless the aircraft has on board authorizations from the State of intended routing.

(3) The operator shall inform the State on the conditions of the aircraft and intended flight and obtain the consent.

(4) The Authority shall require a properly executed maintenance endorsement statement in the aircraft permanent record by an authorised person stating the subject aircraft inspected and found to be safe for the intended flight.

Certificate of  
fitness for  
flight

**20.**-(1) A person shall not fly an aircraft for the purpose of flight testing after repair, modification or maintenance unless that aircraft has been issued with a maintenance endorsement statement.

(2) The maintenance endorsement statement referred to in sub regulation (1) shall constitute a certificate of fitness for flight.

(3) A certificate of fitness for flight shall be issued by an appropriate qualified person in accordance with these Regulations and the Civil Aviation (Personnel Licensing) Regulations, 2011.

(4) A certificate of fitness for flight is the basis under which the Authority may issue a special flight permit under Regulation 17 for the purpose of allowing the aircraft to be ferried.

(5) A certificate of fitness for flight may be used as a basis to flight test an aircraft after repair, modifications or maintenance as long as the aircraft does not make an international flight; and is not, for purposes of these Regulations, and certificate airworthiness.

PART IV  
CONTINUING AIRWORTHINESS OF AIRCRAFT  
AND AIRCRAFT COMPONENTS

Responsibility  
for  
maintenance

**21.**-(1) An owner or operator of an aircraft shall be responsible for maintaining the aircraft in an airworthy condition by ensuring that-

- (a) all maintenance which affect airworthiness are performed as prescribed by the State of Registry;
- (b) maintenance personnel makes appropriate entries in the aircraft maintenance records certifying that the aircraft is airworthy;
- (c) the certificate of release to service is completed to the effect that the maintenance work performed is completed and in accordance with the prescribed methods including shall an approved maintenance schedule for AOC holders as approved by the Authority; and
- (d) in the event there are open discrepancies, the certificate of release to service includes a list of the uncorrected maintenance items which are made a part of the aircraft permanent records.

(2) In the event that an aircraft registered in the United Republic of Tanzania is continuously operated outside the United Republic of Tanzania for a period exceeding thirty days, the owner or operator of the aircraft shall be responsible for maintaining the aircraft in an airworthy condition and ensuring that-

- (a) notice in a form prescribed by the Authority, is given to the Authority prior to the aircraft undertaking such operations; and
- (b) arrangements acceptable to the Authority for ongoing inspection and oversight of the airworthiness of that aircraft are made.

(3) The operator of a helicopter of over 3,175 kg maximum mass shall monitor and assess maintenance and operational experience with respect to continuing airworthiness and provide the information as prescribed by the State of Registry and report through the system prescribed by the Authority.

Continuing  
airworthiness  
information

**22.** An operator of an aircraft shall-

- (a) monitor and assess maintenance and operational experience with respect to continuing airworthiness and provide the information as prescribed by the Authority and report through a specified system; and
- (b) obtain and assess continuing airworthiness information and recommendations available from the organisation responsible for the type design and implement resulting actions considered necessary in accordance with a procedure acceptable to the Authority.

Responsibilities  
of State of  
Registry  
in respect of  
continuing  
airworthiness

**23.** The State of Registry shall-

- (a) where it first enters on its register an aircraft of a particular type for which it is not the State of Design and issues or validates a Certificate of Airworthiness in accordance with regulation 14, notify the State of design that has entered such an aircraft on its register;
- (b) determine the continuing airworthiness of an aircraft in relation to the appropriate airworthiness requirements in force for that aircraft;
- (c) ensure the transmission to the State of Design of all mandatory continuing airworthiness information which it, as the State of Registry, originated in respect of that aircraft; and
- (d) ensure that, in respect of aeroplanes over 5,700 kg and helicopters over 3,175 kg maximum certificated take-off mass, there exists a system whereby information on faults, malfunctions, defects and other occurrences that cause or might cause adverse effects on the continuing airworthiness of the aircraft is transmitted to the organization responsible for the type design of that aircraft.

Compliance  
with the  
manufacturer's

**24.** An aircraft registered in the United Republic of Tanzania shall not engage in commercial air transport operations, unless-

instructions

- (a) the aircraft, including its engines, equipment and radios has been maintained in accordance with the approved maintenance programme and maintenance procedures recommended by the aircraft manufacturer;
- (b) a certificate of release to service has been completed and signed by a licensed aircraft maintenance engineer to certify that all maintenance work is completed and is in accordance with the approved maintenance programme and procedures; and
- (c) there is an approved flight manual available in the aircraft for the use of the flight crew, containing the limitations within which the aircraft is considered airworthy, together with such additional instructions and information as may be necessary to show compliance with the specified regulations relating to performance and for the safe operation of the aircraft, except that if the aircraft has a maximum take off certificated mass of 5,700 kg or less, the limitations may be made available by means of placards or other documents approved by the Authority.

Reporting of failures, malfunctions, and defects

**25.**-(1) An owner or operator of an aircraft registered in the United Republic of Tanzania shall report to the Authority any failures, malfunctions, or defects that may result in at least one of the following-

- (a) fires during flight and whether the related fire-warning system is properly operated;
- (b) fires during flight not protected by a related fire-warning system is;
- (c) false fire warning during flight;
- (d) an engine exhaust system that causes damage during flight to the engine, adjacent structure, equipment, or components;
- (e) an aircraft component that causes accumulation or circulation of smoke, vapour, toxic or noxious fumes in the crew compartment or passenger cabin during flight;
- (f) engine shutdown during flight because of flameout;
- (g) engine shutdown during flight when external damage to the

- engine or aircraft structure occurs;
- (h) engine shutdown during flight due to foreign object ingestion or icing;
  - (i) shutdown during flight of more than one engine on a multi-engine aircraft;
  - (j) a propeller feathering malfunction or inability of the system to control over-speed during flight;
  - (k) a fuel or fuel-dumping system malfunction that affects fuel flow or causes hazardous leakage during flight;
  - (l) an uncommanded landing gear extension or retraction, or opening or closing of landing gear doors during flight;
  - (m) brake system components malfunction that result in loss of brake actuating force when the aircraft is in motion on the ground;
  - (n) aircraft structure damage that requires major repair;
  - (o) failure or malfunction of any flight control system, flap, slat or spoiler;
  - (p) any excessive unscheduled removals of essential equipment on account of defects;
  - (q) cracks, permanent deformation, or corrosion of aircraft structure, if more than the maximum acceptable to the manufacturer or the Authority;
  - (r) aircraft components or systems malfunctions that result in taking emergency actions during flight except action to shut down an engine;
  - (s) emergency evacuation systems or components including all exit doors, passenger emergency evacuating lighting systems, or evacuation equipment that are found defective, or that fail to perform the intended functions during an actual emergency or during training, testing, maintenance, demonstration, or inadvertent deployments;
  - (t) each interruption to a flight, unscheduled change of aircraft en route, or unscheduled stop or diversion from a route, caused by known or suspected technical difficulties or malfunctions;
  - (u) any abnormal vibration or buffeting caused by a structural or

system malfunction, defect, or failure;

- (v) failure or malfunction of more than one attitude, airspeed, or altitude instrument during a given operation of the aircraft;
- (w) the number of engines removed premature because of malfunction, failure or defect, listed by make and model and the aircraft type in which it was installed; or
- (x) the number of propeller featherings in flight, listed by type of propeller and engine and aircraft on which it was installed.

(2) A report required under this regulation shall be made within three days after determining that the failure, malfunction, or defect required to be reported has occurred and includes the following information-

- (i) type and registration mark of the aircraft;
- (ii) name of the operator;
- (iii) aircraft serial number;
- (iv) where the failure, malfunction, or defect is associated with an article approved under a Technical Standard Order authorisation, the article serial number and model designation, as appropriate;
- (v) where the failure, malfunction or defect is associated with an engine or propeller, the engine or propeller serial number, as appropriate;
- (vi) product model;
- (vii) identification of the part, component, or system involved, including the part number; and
- (viii) the nature of the failure, malfunction, or defect.

(3) The Authority, upon receipt of the report specified in sub-regulation (2) for aircraft registered in the United Republic of Tanzania, shall submit the reports to the State of Design.

(4) The Authority, upon receipt of the report specified in sub-regulation (2) for foreign registered aircraft operating in the United Republic of Tanzania, shall submit such reports to the State of Registry and the State of Design.

PART V  
AIRCRAFT MAINTENANCE AND INSPECTION.

Persons  
authorised to  
perform  
maintenance,  
preventive  
maintenance  
and  
modification

**26.-(1)** A person shall not perform any task defined as maintenance on an aircraft or aircraft components, except as provided in this regulation.

(2) The following are the persons authorised to perform maintenance, preventive maintenance and modification-

- (a) a pilot licensed by the Authority ;
- (b) a person performing maintenance under the supervision of a licensed aircraft maintenance engineer(LAME);
- (c) an LAME; and
- (d) an AMO.

(3) A pilot licensed by the Authority may perform preventive maintenance on an aircraft of maximum certificated take-off mass of 5,700 kg or less owned or operated by that pilot so long as the aircraft is not listed for use by an AOC holder and the pilot has attended maintenance course on the type of aircraft;

(4) A pilot licenced by the Authority operating a balloon listed for use by an AOC holder may perform maintenance, preventive maintenance and modification on balloons, provided that pilot has been trained on the appropriate balloon maintenance;

(5) A person working under the supervision of a LAME may perform the maintenance, preventive maintenance, or modifications that the LAME is authorised to perform if the supervising LAME-

- (a) personally observes the work being done to the extent necessary to ensure that it is being done properly; and
- (b) is readily available, in person, for consultation.

(6) A LAME may perform or supervise the maintenance or modification of an aircraft or aircraft component for which he is rated in accordance with the Civil Aviation (Personnel Licensing) Regulation, 2010.

(7) An AMO may perform aircraft maintenance within the limits specified by the Authority.

- (8) A manufacturer who holds an AMO certificate may-
  - (a) rebuild or alter any aircraft component manufactured by that manufacturer under a type or production certificate;
  - (b) rebuild or alter any aircraft component manufactured by that manufacturer under a Technical Standard Order Authorisation, a Parts Manufacturer Approval by the State of Design, or product and process specification issued by the State of Design; and
  - (c) perform any inspection required by the Civil Aviation (Operation of Aircraft) Regulations, 2011 on aircraft that the manufacturer manufactures, while currently operating under a production certificate or under a currently approved production inspection system for such aircraft.

Personnel authorised to approve for return to service

**27.**-(1) Except as authorized by the Authority, a person shall not approve an aircraft, airframe, engine, propeller, appliance, or component for return to service after it has undergone maintenance, preventive maintenance, rebuilding, or modification.

(2) The following persons are authorised to approve for return to service-

- (a) a pilot licensed by the Authority who may return his aircraft to service after performing authorised preventive maintenance provided he has successfully completed an approved maintenance course on the type of aircraft.;
- (b) a LAME who may approve aircraft and aircraft components for return to service after the LAME has performed, supervised, or inspected its maintenance subject to the limitations specified in the Civil Aviation (Personnel Licensing) Regulations, 2011; or
- (c) an AMO who may approve aircraft and aircraft components for return to service as provided in the operations specific provisions approved by the Authority.

Persons authorised to perform

**28.**-(1) Except as authorized by the Authority, a person shall not perform the inspections required by the Civil Aviation (Operation of

inspections

Aircraft) Regulations, 2011 for aircraft and aircraft components prior to or after the aircraft has undergone maintenance, preventive maintenance, rebuilding, or modification.

- (2) The following persons are authorised to carry out inspections-
  - (a) a LAME who may conduct the required inspections of aircraft and aircraft components for which the LAME is rated and current; or
  - (b) an AMO that may perform the required inspections of aircraft and aircraft components as provided in the specific operating provisions approved by the Authority.

Preventive  
Maintenance;  
Limitations.

**29.** The Preventive maintenance is limited to the following work-

- (a) removal, installation and repair of landing gear tires;
- (b) replacing elastic shock absorber cords on landing gear;
- (c) servicing landing gear shock struts by adding oil, air, or both;
- (d) servicing landing gear wheel bearings, such as cleaning and greasing;
- (e) replacing defective safety wiring or cotter keys;
- (f) lubrication not requiring disassembly other than removal of non-structural items such as cover plates, cowlings, and fairings;
- (g) making simple fabric patches not requiring rib stitching or the removal of structural parts or control surfaces;
- (h) replenishing hydraulic fluid in the hydraulic reservoir;
- (i) refinishing decorative coating of fuselage, wings, tail group surfaces excluding balanced control surfaces, fairings, cowlings, landing gear, cabin, or cockpit interior when removal or disassembly of any primary structure or operating system is not required;
- (j) applying preservative or protective material to components where no disassembly of any primary structure or operating system is involved and where such coating is not prohibited or is not contrary to good practices;

- (k) repairing upholstery and decorative furnishings of the cabin or cockpit when the repairing does not require disassembly of any primary structure or operating system or interfere with an operating system or affect primary structure of the aircraft;
- (l) making small simple repairs to fairings, non-structural cover plates, cowlings, and small patches and reinforcements not changing the contour so as to interfere with proper airflow;
- (m) replacing side windows where work does not interfere with the structure of any operating system such as controls and electrical equipment;
- (n) replacing safety belts;
- (o) replacing seats or seat parts with replacement parts approved for the aircraft, not involving disassembly of any primary structure or operating system;
- (p) troubleshooting and repairing broken circuits in landing light wiring circuits;
- (q) replacing bulbs, reflectors, and lenses of position and landing lights;
- (r) replacing wheels and skis where no mass and balance computation is involved;
- (s) replacing any cowling not requiring removal of the propeller or disconnection of flight controls;
- (t) replacing or cleaning spark plugs and setting of spark plug gap clearance;
- (u) replacing any hose connection except hydraulic connections;
- (v) replacing prefabricated fuel lines;
- (w) cleaning fuel and oil strainers;
- (x) replacing and servicing batteries;
- (y) replacement or adjustment of non-structural fasteners incidental to operations; and
- (z) the installation of anti-misfueling devices to reduce the diameter of fuel tank filler openings provided the specific device has been made a part of the aircraft type certificate data by the aircraft manufacturer, and the manufacturer has

Performance  
rule:  
maintenance

provided appropriately approved instructions acceptable to the Authority for the installation of the specific device, and installation does not involve the disassembly of the existing filler opening.

**30.**-(1) A person performing maintenance, preventive maintenance, or modification on an aircraft or aircraft component shall use the methods, techniques, and practices prescribed in-

- (a) the current manufacturer's maintenance manual or instructions for continued airworthiness issued by its manufacturer; and
- (b) additional methods, techniques and practices required by the Authority or methods, techniques and practices approved by the Authority where the manufacturer's documents were not available.

(2) A person shall use the tools, equipment, and test apparatus necessary to assure completion of the work in accordance with accepted industry practices.

(3) If the involved manufacturer recommends special equipment or test apparatus, the person performing maintenance shall use that equipment or apparatus, or its equivalent acceptable to the Authority.

(4) A person performing maintenance, preventive maintenance, or modification on an aircraft or aircraft component shall do that work in such a manner, and use materials of such a quality, that the condition of the aircraft or aircraft component worked on will be at least equal to its original or properly altered condition with regard to aerodynamic function, structural strength, resistance to vibration and deterioration, and other qualities affecting airworthiness.

(5) The methods, techniques, and practices contained in an AOC holder's maintenance control manual and, maintenance programme, as approved by the Authority, will constitute an acceptable means of compliance with the requirements of this regulation.

(6) The methods, techniques, and practices contained in an AMO Maintenance Procedures Manual as approved by the Authority, shall constituteS an acceptable means of compliance with the requirements of this Regulation.

Performance  
rules:  
inspection

**31.-(1)** A person performing an inspection required by the Authority shall-

- (a) perform the inspection so as to determine whether the aircraft or portion of the aircraft under inspection meets all applicable airworthiness requirements; and
- (b) if there is an inspection program required or accepted for the specific aircraft being inspected, perform the inspection in accordance with the instructions and procedures specified in the inspection program.

(2) A person performing an inspection required on a rotorcraft shall inspect, in accordance with the maintenance manual or instructions for continued airworthiness, and the systems shall include, but not limited to -

- (a) the drive shafts or similar systems;
- (b) the main rotor transmission gear box for obvious defects;
- (c) the main rotor and centre section or the equivalent area; and
- (d) the auxiliary rotor on helicopters.

(3) A person performing an inspection shall use a checklist while performing the inspection, which-

- (a) may be of the person's own design, one provided by the manufacturer of the equipment being inspected, or one obtained from another source; and
- (b) include the scope and detail of the items prescribed or approved by the Authority.

(4) A person approving a reciprocating-engine-powered aircraft for return to service after an inspection shall, before that approval, run the aircraft engine to determine satisfactory performance in accordance with the current manufacturer's recommendations of-

- (a) power output of static and idle revolutions per minute;
- (b) magnetos;
- (c) fuel and oil pressure; and
- (d) cylinder and oil temperature.

(5) A person approving a turbine-engine-powered aircraft for return to service shall, before that approval, run the aircraft engine to determine satisfactory performance in accordance with the current

manufacturer's recommendations.

(6) A person performing an inspection shall, before that inspection, clean the aircraft and aircraft engine and remove or open all necessary inspection plates, access doors, fairings, and cowlings.

(7) A person performing an inspection shall inspect, where applicable, the following components-

(a) fuselage and hull group which includes-

- (i) fabric and skin for deterioration, distortion, other evidence of failure, and defective or insecure attachment of fittings; and
- (ii) systems and components for improper installation, apparent defects, and unsatisfactory operation;

(b) cabin and cockpit group which includes-

- (i) generally for uncleanliness and loose equipment that might foul the controls;
- (ii) seats and safety belts for poor condition and apparent defects;
- (iii) leakage;
- (iv) instruments- for poor condition, mounting, marking, and where practicable for improper operation;
- (v) flight and engine controls - for improper installation and improper operation;
- (vi) batteries for improper installation and improper charge; and
- (vii) all systems for improper installation, poor general condition, apparent and obvious defects, and insecurity of attachment.

(c) engine and nacelle group which include

- (i) engine section for visual evidence of excessive oil, fuel, or hydraulic leaks, and sources of such leaks;
- (ii) studs and nuts for improper torquing and obvious defects;
- (iii) internal engine for cylinder compression and for metal particles or foreign matter on screens and

- or apparent defects;
- (e) wing and centre section assembly includes-
  - (i) poor general condition;
  - (ii) fabric or skin deterioration;
  - (iii) distortion;
  - (iv) evidence of failure; and
  - (v) insecurity of attachment;
- (f) complete empennage assembly for-
  - (i) poor general condition;
  - (ii) fabric or skin deterioration;
  - (iii) distortion;
  - (iv) evidence of failure;
  - (v) insecure attachment;
  - (vi) improper component installation; and
  - (vii) improper component operation.
- (g) propeller group for-
  - (i) propeller assembly - for cracks, nicks, binds, and oil leakage;
  - (ii) bolts - for improper torquing and lack of safety;
  - (iii) anti-icing devices - for improper operations and obvious defects; and
  - (iv) control mechanisms - for improper operation, insecure mounting, and restricted travel;
- (h) avionics and instrument equipment for-
  - (i) improper installation and insecure mounting;
  - (ii) wiring and conduits - for improper routing, insecure mounting, and obvious defects;
  - (iii) bonding and shielding - for improper installation and poor condition;
  - (iv) antenna including trailing antenna - for poor condition, insecure mounting, and improper operation; and
- (i) electronic or electrical group which include-
  - (i) wiring and conduits - for improper routing, insecure mounting, and obvious defects;

- (ii) bonding and shielding - for improper installation and poor condition; and
- (j) each installed miscellaneous item that is not otherwise covered by this listing or has instructions for continued airworthiness - for improper installation and improper operation.

Airworthiness  
limitation  
performance  
rules

**32.** A person performing an inspection or other maintenance specified in an airworthiness limitations section of a current manufacturer's maintenance manual, or instructions for continued airworthiness, shall perform the inspection or other maintenance in accordance with regulation 30, or in accordance with specific operating provisions approved by the Authority.

Aircraft mass  
schedule

**33.-(1)** An aircraft in respect of which a certificate of airworthiness is issued under these Regulations shall be weighed and the position of the aircraft's centre of gravity determined, at such times and in such manner as the Authority may require or approve in the case of that aircraft.

(2) Upon the aircraft being weighed, the owner or operator of the aircraft shall prepare a mass schedule showing-

- (a) the basic mass of the aircraft, namely the mass of the empty aircraft together with the mass of unusable fuel and unusable oil in the aircraft and of such items of equipment as indicated in the mass schedule, or such other mass as may be approved by the Authority in the case of that aircraft; or
- (b) the position of the centre of gravity of the aircraft when the aircraft contains only the items included in the basic mass or such other position of the centre of gravity as may be approved by the Authority in the case of that aircraft.

(3) The mass schedule shall be preserved by the operator of the aircraft until the expiration of a period of six months following the next occasion on which the aircraft is weighed for the purpose of this regulation.

PART VI  
AIRCRAFT NOISE CERTIFICATION

Requirement  
of noise  
certification.

**34.** An aircraft to which this regulation applies shall not land or take off in the United Republic of Tanzania unless there is in force a noise certificate issued or rendered valid by the competent Authority in which the aircraft is registered.

Issue,  
suspension,  
revocation of  
aircraft noise  
certificate

**35.-(1)** An aircraft included in the classification defined for noise certification purpose in Part A of the First Schedule to these Regulations shall be issued with a noise certificate or a suitable statement attesting noise certification contained in another document approved by the State of Registry and required by that state to be carried in the aircraft.

(2) The noise certificate referred to in sub-regulation (1) shall be issued or validated by the Authority on the basis of satisfactory evidence that the aircraft complies with the requirements which are at least equal to the applicable standards specified in the First Schedule to these Regulations.

(3) The document attesting noise certification of an aircraft shall provide information in accordance with Part B of the First Schedule to these regulations.

(4) The Authority shall-

- (a) suspend or revoke the noise certificate of aircraft on the civil aircraft register if the aircraft ceases to comply with the applicable noise standards; and
- (b) not re-instate or grant a new noise certificate unless the aircraft is found on reassessment to comply with the applicable noise standards.

PART VII  
MAINTENANCE RECORDS AND ENTRIES

Keeping  
certificate of  
release to  
service records

**36.**-(1) Pursuant to the terms and conditions set forth in the Civil Aviation (Air Operator Certification and Administration) Regulations, 2011, a certificate of release to service shall be maintained by an AOC holder in duplicate.

(2) A certificate of release to service issued shall-

- (a) be effective from the date of issue;
- (b) cease to be effective upon expiration of the period in calendar days or flight time, whichever is earlier as specified in the maintenance schedule; and
- (c) be kept on board the aircraft and the original kept by the operator elsewhere as approved by the Authority.

Technical  
Logbook

**37.**-(1) A technical logbook shall be kept in respect of every aircraft registered in the United Republic of Tanzania in respect of which a certificate in either commercial air transport or aerial work category is in force.

(2) Technical logbook entries on defects which affect the airworthiness and safe operation of the aircraft shall be made as specified in regulation 66 of the Civil Aviation (Air Operator Certification and Administration) Regulations, 2011.

(3) Upon rectification of any defect which has been entered in the technical logbook in accordance with sub-regulation (2) of this regulation, a person issuing a certificate of release to service under Civil Aviation (Approved Maintenance Organisation) Regulations, 2011 in respect of that defect shall enter that certificate in the technical logbook.

Aircraft,  
engine and  
propeller  
logbooks

**38.**-(1) In addition to any other log books required by or under these Regulations, the following log books shall be kept in respect of aircraft registered in the United Republic of Tanzania-

- (a) an aircraft log book;
- (b) a separate log book in respect of each engine fitted in the aircraft; and

(c) a separate log book in respect of each variable pitch propeller fitted to the aircraft;

(2) The log books shall include the particulars respectively specified in the Second Schedule to these Regulations and in the case of an aircraft having a maximum certificated take-off mass of 2730 kg or less, shall be of a type approved by the Authority.

(3) An entry in a log book other than such an entry as is referred to in paragraphs 2(d) (ii) or 3 (d)(ii) of the Second Schedule to these Regulation shall be made as soon as practicable after the occurrence to which it relates, but not more than 7 days after the expiration of the certificate of release to service, in force in respect of the aircraft at the time of the occurrence.

(4) An entry in a log book, being such an entry referred to in paragraphs 2(d) (ii) or 3(d)(ii) of the Second Schedule to these Regulation shall be made upon each occasion maintenance, overhaul, repair, replacement, modification or inspection is undertaken on the engine or propeller as the case may be.

(5) Entries in the log book may refer to other documents which shall be clearly identified, and any other documents so referred to shall be deemed, for the purposes of this regulation to be part of the log book.

(6) It shall be the duty of the operator of every aircraft in respect of which log book is required to be kept to keep the log book or cause to be kept in accordance with this regulation.

(7) Subject to this regulation, every log book shall be preserved by the operator of the aircraft until two years after the aircraft, the engine or the variable pitch propeller as the case may be, has been destroyed or has been permanently withdrawn from use.

Records of  
maintenance

**39.-(1)** A person who performs maintenance on an aircraft or aircraft component shall, when the work is performed make an entry in the maintenance record of that equipment as follows-

- (a) a description or reference to data acceptable to the Authority of work performed;
- (b) completion date of the work performed; and
- (c) name, signature and licence number of the person approving

the work.

(2) The signature required by sub-regulation (1)(c) shall constitute the approval for return to service only for the work performed.

(3) A person working under the supervision of a LAME shall not perform any inspection required in the Civil Aviation (Operation of Aircraft) Regulations, 2011 or any inspection performed after a major repair or modification.

(4) A person performing the work referred to in sub-regulation (1) shall enter records of major repairs and major modifications, in a prescribed form set out in the Third Schedule.

(5) A person performing a major repair or major modification shall-

(a) execute the appropriate form prescribed by the Authority at least in duplicate;

(b) give a signed copy of that form to the aircraft owner or operator; and

(c) forward a copy of that form to the Authority, in accordance with Authority instructions, within forty eight hours after the aircraft or aircraft component is approved for return to service.

(6) An AMO which performs a major repair or modification shall-

(a) use the aircraft owner or operator 's work order upon which the repair is recorded;

(b) give the aircraft owner or operator's a signed copy of the work order and retain a duplicate copy for at least one year from the date of approval for return to service of the aircraft or aircraft component;

(c) give the aircraft owner or operator a certificate of release to service signed by an authorised representative of the AMO and incorporating the following information-

(i) identity of the aircraft or aircraft component-

(aa) the make, model, serial number, nationality and registration marks, and location of the repaired area of an aircraft;

(bb) the manufacturer's name, name of the part, model, and serial numbers if any of an

aircraft component; and

- (d) signature of the authorised representative, the name and address of the AMO and AMO certificate number.

Records of  
overhaul and  
rebuilding

**40.**-(1) A person shall not record in any required maintenance entry or form, an aircraft or aircraft component as being overhauled unless the aircraft or aircraft component has been-

- (a) disassembled, cleaned, inspected as permitted, repaired as necessary, and reassembled using methods, techniques, and practices acceptable to the Authority; and
- (b) tested in accordance with approved standards and technical data, or in accordance with current standards and technical data acceptable to the Authority, which have been developed and documented by the holder of the type certificate, supplemental type certificate, or a material, part, process, or appliance manufacturing approval.

(2) A person shall not record in any required maintenance entry or form an aircraft or aircraft component as being rebuilt unless the aircraft or aircraft component disassembled, cleaned, inspected as permitted, repaired as necessary, reassembled and tested to the same tolerances and limits as a new item, using either new parts or used parts that conform to new part tolerances and limits.

Approval for  
return to  
service

**41.** A person shall not approve for return to service any aircraft or aircraft component that has undergone maintenance, preventive maintenance, rebuilding, or modification unless-

- (a) the appropriate maintenance record entry has been made in accordance with these Regulations;
- (b) the major repair or major modification form specified in the Third Schedule of these Regulations has been executed in the manner prescribed by the Authority;
- (c) if a major repair or major modification results in any change in the aircraft operating limitations or flight data contained in the approved aircraft flight manual, those operating limitations or flight data are appropriately revised and set out as prescribed.

Content, form,  
and disposition  
of records for  
inspections

**42.-(1)** A person who approves the return to service of an aircraft or aircraft component after any inspection performed in accordance with the Civil Aviation (Operation of Aircraft) Regulations, 2011 shall make an entry in the maintenance record of that equipment containing the following information-

- (a) type of inspection and a brief description of the extent of the inspection;
- (b) date of inspection;
- (c) aircraft total time and cycles in service;
- (d) signature, the license number held by the person approving return to service the aircraft or aircraft component;
- (e) if the aircraft is found to be airworthy and approved for return to service, the person shall include a statement certifying that the aircraft has been inspected in accordance with the type of work and was determined to be in an airworthy condition;
- (f) if the aircraft is not approved for return to service because the aircraft needs maintenance, non-compliance with the applicable specifications, airworthiness directives, or other approved data, a statement that the aircraft has been inspected in accordance with inspection and a dated list of discrepancies and unairworthy items has been provided to the aircraft owner or operator; and
- (g) if an inspection is conducted under an inspection program provided for in the Civil Aviation (Operation of Aircraft) Regulations, 2011 the person performing the inspection shall make an entry identifying the inspection program accomplished, and containing a statement that the inspection was performed in accordance with the type of inspections and procedures for that particular program.

(2) A person performing any inspection required in the Civil Aviation (Operation of Aircraft) Regulations, 2011 who finds that the aircraft is not airworthy or does not meet the applicable type certificate data sheet, airworthiness directives or other approved data upon which the aircraft's airworthiness depends, shall give the owner or operator a signed

and dated list of those discrepancies.

Damage to aircraft      **43.**-(1) Where an aircraft registered in ‘*State*’ or in another Contracting States has sustained damage, the Authority shall judge whether the damage is of a nature that affects the airworthiness of the aircraft and prohibit the aircraft from resuming flight, until it is restored to an airworthy condition.

(2) Where the aircraft is from another Contracting State, the Authority shall notify the State of Registry of that aircraft immediately.

(3) Notwithstanding sub regulation (1), the Authority may, in exceptional circumstances, prescribe particular limiting conditions to permit the aircraft to fly a non-commercial air transport operation to an aerodrome at which it will be restored to an airworthy condition.

#### PART VIII GENERAL PROVISIONS

Possession of the licence, certificate or authorisation      **44.**-(1) A holder of a licence, certificate or authorisation issued by the Authority shall have in his physical possession or at the work site when exercising the privileges of that licence, certificate or authorisation.

(2) A crew member of a foreign registered aircraft shall hold a valid licence, certificate or authorisation and have in his or her physical possession or at the work site when exercising the privileges of that licence, certificate or authorisation.

Inspection of licences, certificates and authorisation      **45.** A person who holds a licence, certificate, or authorisation required by these Regulations shall present it for inspection upon a request from the Authority or any other person authorised by the Authority.

Change of Address      **46.**-(1) A holder of a certificate, shall notify the Authority of the change in the physical and mailing address and shall do so in the case of-

- (a) physical address, at least fourteen days before the change;
- and

(b) mailing address, upon the change;

(2) A person who does not notify the Authority of the change in the physical address within the time frame specified in sub-regulation (1) shall not exercise the privileges of the certificate or authorisation.

Replacement  
of documents

**47.** A person may apply to the Authority in a prescribed form for replacement of documents issued under these Regulations if such documents are lost or destroyed.

Suspension  
and  
revocations of  
certificates.

**48.-(1)** The Authority may, where it considers it to be in the public interest, suspend provisionally, pending further investigation, any certificate such other document issued under these Regulations.

(2) The Authority may, upon the completion of an investigation which has shown sufficient ground to the Authority's satisfaction and where it considers it to be in the public interest, revoke, suspend, or vary any certificate or any other document issued or granted under these Regulations.

(3) The Authority may, where it considers it to be for the public interest, prevent any person or aircraft from flying.

(4) A holder or any person having the possession or custody of any certificate or other documents which has been revoked, suspended or varied under these Regulations shall surrender the certificate, licence or such other documents to the Authority within fourteen days from the date of revocation, suspension or variation.

(5) The breach of any condition subject to which any certificate or any such other document has been granted or issued under these Regulations shall render the document invalid during the continuance of the breach.

Use and  
retention of  
certificates and  
records.

**49.-(1)** A person shall not-

(a) use any certificate, or such other document issued or required under these Regulations which has been forged, altered, revoked, or suspended, or to which that person is not entitled;

- (b) forge or alter any certificate or other document issued or required under these Regulations;
- (c) lend any certificate or other document issued or required under these Regulations to any other person;
- (d) make any false representation for the purpose of procuring for himself or any other person the issue, renewal or variation of the certificate or any such other document; or

(2) During the period for which is required under these Regulations to be preserved, a person shall not mutilate, alter, render illegible or destroy any records, or any entry made therein, required under these Regulations to be maintained, or knowingly make, or procure or assist in the making of, any false entry in any such record, or wilfully omit to make a material entry in such record.

(3) All records required to be maintained under these Regulations shall be recorded in a permanent and indelible material.

(4) A person shall not purport to issue any certificate or other document for the purpose of these Regulations unless is authorised to do so under these Regulations.

(5) A person shall not issue any certificate of the kind referred to in sub-regulation unless he has satisfied himself that all statements in the certificate are correct, and that the applicant is qualified to hold that certificate.

Reports of  
violation.  
Cap. 80

**50.-(1)** A person who knows of violation of the Civil Aviation Act, or any rule, regulation or order made there-under, shall report it to the Authority.

(2) The Authority shall determine the nature and type of any additional investigation or enforcement action that need be taken.

Enforcement of directions.

**51.** A person who fails to comply with direction given to him by the Authority or any authorised person under any provision of these Regulations shall be deemed for the purposes of these Regulations to have contravened that provision.

Aeronautical user fees

**52.-(1)** The Authority shall notify the fees to be charged in connection with the issue, validation, renewal, extension or variation of any certificate, licence or such other document, including the issuing of a copy or the undergoing of any examination, test, inspection or investigation or the grant of any permission or approval, required by, or for the purpose of these Regulations any orders, notices or proclamations made thereunder.

(2) Upon an application being made in connection with which any fee is chargeable in accordance with the sub-regulation (1), the applicant shall be required, before the application is entertained, to pay the fee so chargeable.

(3) Upon an application being made in connection with which any fee is chargeable in accordance with the sub-regulation (1), the applicant shall be required, before the application is entertained, to pay the fee so chargeable.

(4) If, payment of a fee has been made and the application is withdrawn by the applicant or otherwise ceases to have effect or is refused, the Authority, shall not refund the payment made.

Application of regulations to Government and visiting forces, etc.

**53.-(1)** These Regulations shall apply to aircraft, not being military aircraft, belonging to or exclusively employed in the service of the Government, and for the purposes of such application, the Department or other authority for the time being responsible for management of the aircraft shall be deemed to be the operator of the aircraft, and in the case of an aircraft belonging to the Government, be the owner of the interest of the Government in the aircraft.

(2) Except as otherwise expressly provided, the naval, military and air force authorities and member of any visiting force and property held or used for the purpose of such a force shall be exempt from the provision of these regulations to the same extent as if the visiting force formed part of the military force of the United Republic of Tanzania.

Extra-territorial application of Regulations

**54.** Except where the context otherwise requires, the provisions of these Regulations shall-

- (a) in so far as they apply, whether by express reference or otherwise, to aircraft registered in the United Republic of Tanzania, apply to such aircraft wherever they may be;
- (b) in so far as they apply, whether by express reference or otherwise, to other aircraft, apply to such aircraft when they are within the United Republic of Tanzania;
- (c) in so far as they prohibit, require or regulate whether by express reference or otherwise the doing of anything by any person in, or by any of the crew of, any aircraft registered in the United Republic of Tanzania, shall apply to such persons and crew, wherever they may be; and
- (d) in so far as they prohibit, require or regulate whether by express reference or otherwise the doing of anything in relation to any aircraft registered in the United Republic of Tanzania by other persons shall, where such persons are citizens of the United Republic of Tanzania, apply to them wherever they may be.

## PART IX

### OFFENCES AND PENALTIES

Contravention of Regulations

**55.** A person who contravenes any provision of these Regulations may have his licence, certificate, approval, authorisation, exemption or such other document revoked or suspended.

**56.**-(1) If any provision of these Regulations, orders, notices or proclamations made there under contravened in relation to an aircraft, the operator of that aircraft and the pilot-in-command, is not the person who contravened that provision he shall, without prejudice to the liability of any other person under these Regulations for that contravention, be deemed to have contravened that provision unless he proves that the contravention occurred without his consent or connivance and that he exercised all due diligence to prevent the contravention.

(2) If it is proved that an act or omission of any person, which would otherwise have been a contravention by that person of a provision of these Regulations, orders, notices or proclamations made there under was due to any cause not avoidable by the exercise of reasonable care by that person, the act or omission shall be deemed not to be a contravention by that person of that provision.

(3) Where a person is charged with contravening a provision of these Regulations orders, notices or proclamations made there under by reason of having been a member of the flight crew of an aircraft on a flight for the purpose of commercial air transport operations, the flight shall be treated, without prejudice to the liability of any other person under these Regulations, as not having been for that purpose if he proves that he neither knew nor had reason to know that the flight was for that purpose.

(4) A person who contravenes any provision of these Regulations, orders, notices or proclamations made thereunder not being a provision referred to in sub-regulation (9) shall, upon conviction, be liable to a fine, not less than one hundred and not more than three hundred US dollars or its equivalent to Tanzania shilling and in the case of a continuing contravention, each day of the contravention shall constitute a separate offence.

(5) In case an aircraft is involved in a contravention and the contravention is by the owner or operator of the aircraft, the aircraft shall be subject to a lien for the penalty.

(6) Any aircraft subject to alien for the purpose of sub-regulation (5) may be seized by and placed in the custody of the Authority.

(7) The aircraft shall be released from custody of the Authority upon-

- (a) payment of the penalty or the amount agreed upon in compromise;
- (b) deposit of a bond in such amount as the Authority may prescribe, conditioned upon payment of the penalty or the amount agreed upon in compromise;
- (c) receiving an order of the court to that effect.

(8) The Authority and any person authorised by name by him or any police officer not below the rank of inspector authorised by name by the Minister, may compound offences under Part A of the Schedule to these Regulations by assessing the contravention and requiring the person reasonably suspected of having committed the offence to pay to the Authority a sum not less than of one hundred United States dollars and not more than three hundred United States dollars or its equivalent in Tanzania shillings for provisions referred to in sub-part (i) and sub-part (ii) respectively in Part A of the Schedule to these Regulations.

(9) If any person contravenes any provision specified in Part B of the Schedule to these Regulations, upon conviction is liable to a fine not less than one thousand United States Dollars or its sequivalent in Tanzanian shillings or to imprisonment for a term of twelve months or to both.

(10) Where any person is aggrieved by any order made under sub-regulation (8), he may, within twenty one days of such order being made, appeal against the order to a higher court and the provisions of Part X of the Criminal Procedure Act, shall apply *mutatis mutandis*, to every such appeal as if it were an appeal against a sentence passed by a district court in the exercise of its original jurisdiction.

Cap. 20

#### PART X TRANSITION, SAVINGS AND REPEAL

Transition,  
Saving and  
Revoked

**57.**—(1) The Civil Aviation (Airworthiness) Regulations, 2006 are hereby revoked.

(2) All valid licences, certificates, permits or authorisations issued or granted by the Authority before the commencement of these regulations shall remain operational until they expire or are revoked, annulled or replaced.

**FIRST SCHEDULE**

Regulation 35(1) and (3)

**AIRCRAFT NOISE CERTIFICATION CLASSIFICATIONS**

PART A:

Classifications as per ICAO Annex 16, Volume I to the Chicago Convention-

Annex Chapter	Details
2	Subsonic Jet Aeroplanes – Application for Certificate of Airworthiness for the prototype accepted before 6 <sup>th</sup> October 1977
	(a) Subsonic Jet Aeroplanes – Application for Certificate of Airworthiness for the prototype accepted on or after 6 <sup>th</sup> October 1977 and before 1 <sup>st</sup> January.....
	(b) -Propeller-Driven Aeroplanes Over 5,700kg –Application for Certificate of Airworthiness for the Prototype accepted on or after 1 <sup>st</sup> January 1985 and before 17 <sup>th</sup> November 1988.
	(c) Propeller-Driven Aeroplanes over 8,618kg – Application for Certificate of Airworthiness for the Prototype accepted on or after 17 <sup>th</sup> November 1988 and before 1 <sup>st</sup> January.....
4	1. Supersonic Aeroplanes-Application for certificate of airworthiness for the prototype accepted on or after 1 <sup>st</sup> January.....
	2. Propeller driven aeroplanes over 8,618 kg – Application for certificate of airworthiness for the prototype accepted on or after 1 <sup>st</sup> January.....
5	Propeller-Driven Aeroplanes over 5,700kg – Application for Certificate of Airworthiness for the Prototype accepted before 1 <sup>st</sup> January 1985
6	Propeller-Driven Aeroplanes Not Exceeding 8,618kg – Application for Certificate of Airworthiness for the Prototype accepted before 17 <sup>th</sup> November 1988
7	Propeller driven STOL Aeroplane.
8	Helicopters
9	Installed Auxiliary power unit (APU) and associated power systems during ground operations.
10	Propeller-Driven Aeroplanes Not Exceeding 8,618kg – Application for Certificate of Airworthiness for the Prototype or derived version accepted on or after 17 <sup>th</sup> November 1988
11	Helicopters Not Exceeding 3,175kg Maximum Certificated Take-off Mass
12	Supersonic aeroplanes
13	Tilt-rotor aircraft

## PART B

### INFORMATION TO BE INCLUDED IN THE DOCUMENT ATTESTING NOISE CERTIFICATION

- (1) The following information shall be included on the document attesting noise certification of an aircraft-
  - (a) State of Registry; nationality and registration marks
  - (b) manufacturer's serial number
  - (c) manufacturer's type and model designation; engine type/model; propeller type and /model (if applicable)
  - (d) statement of any additional modifications incorporated for the purposes of compliance with the applicable noise certification standards;
  - (e) the maximum mass at which compliance with the applicable noise certification standards has been demonstrated only one maximum take-off and landing pair shall be certificated for each individual aircraft;
  - (f) for aeroplanes for which application for certification of the prototype was submitted on or after 6<sup>th</sup> October 1977, and for helicopters for which application for certification of the prototype was submitted on or after 1<sup>st</sup> January 1985: the average noise level at the reference point for which compliance with the applicable standards has been demonstrated to the satisfaction of the certifying authority;
  - (g) the Chapter of Annex 16 Volume 1, according to which the aircraft was certificated.
  - (h) the height above the runway at which thrust/ power is reduced following full thrust /power take-off.
  
- (2) The information stated under subparagraphs (a) – (h) shall also be included in the aircraft flight manual. Concerning 1(h) a note shall be added stating the thrust/power cut back height relates to the noise certification demonstration procedure and is not intended for use in normal operations.

**SECOND SCHEDULE**

Regulation 37(2), (3),(4) and 38

**AIRCRAFT, ENGINE AND PROPELLER LOG BOOKS**

<p>Aircraft log book:</p> <p>(1) The following entries shall be included in the aircraft log book-</p> <ul style="list-style-type: none"><li>(a) the name of the constructor, the type of the aircraft, the number assigned to it by the constructor and the date of construction of the aircraft;</li><li>(b) the nationality and registration marks of the aircraft;</li><li>(c) the name and address of the operator of the aircraft;</li><li>(d) the date of each flight and the duration of the period between take-off and landing, or, if more than one flight was made on that day, the number of flights and the total duration of the periods between take-off and landings on that day;</li><li>(e) particulars of all maintenance work carried out on the aircraft or its equipment;</li><li>(f) particulars of any defects occurring in the aircraft or in any equipment required to be carried in it by or under these Regulations, and of the action taken to rectify such defects including a reference to the relevant entries in the technical log required by Regulations 10(2) and (3) of these Regulations.</li><li>(g) particulars of any overhauls, repairs, replacements and modifications relating to the aircraft or any such equipment as aforesaid.</li></ul> <p>Provided that entries shall not be required to be made under subparagraphs (e), (f) and (g) in respect of any engine or variable pitch propeller.</p>
<p>(2) The following entries shall be included in the engine log book-</p> <ul style="list-style-type: none"><li>(a) the name of the constructor, type of engine, the number assigned to it by the constructor and the date of the construction of the engine;</li><li>(b) the nationality and registration marks of each aircraft in which the engine is fitted;</li><li>(c) the name and address of the operator of each such aircraft-</li><li>(d) either-</li></ul>
<ul style="list-style-type: none"><li>(i) the date of each flight and the duration of the period between take off and landing or, if more than one flight was made on that day, the number of flights and the total duration of the periods between take-off and landings on that day; or</li></ul>

(ii) the aggregate duration of periods between take-off and landing for all flights made by that aircraft since, the immediately preceding occasion that any maintenance, overhaul, repair, replacement, modification or inspection was undertaken on the engine.
(e) Particulars of all maintenance work done on the engine;
(f) Particulars of any defects occurring in the engine, and of the rectification of such defects, including reference to the relevant entries in the technical log required by regulation 10(2) and (3) of these Regulations;
(g) Particulars of all overhauls, repairs, replacement and modifications relating to the engine or any of its accessories.
(3) The following entries shall be included in the variable pitch propeller log book-
(a) the name of the constructor, the type of the propeller, the number assigned to it by the constructor and the date of the construction of the propeller;
(b) the nationality and registration marks of each aircraft, and the type and number of each engine, to which the propeller is fitted;
(c) the name and address of the operator of each such aircraft;
(d) either-
(i) the date of each flight and the duration of the period between take-off and landing or, if more than one flight was made on that day, the number of flights and the total duration of the periods between take-off and landings on that day; or
(ii) the aggregated duration of periods between take-off and landing for all flights made by that aircraft since the immediately preceding occasion that any maintenance, overhaul, repair, replacement, modification or inspection was undertaken on the propeller;
(e) particulars of all maintenance work done on the propeller;
(f) particulars of any defects occurring in the propeller, and of the rectification of such defects, including a reference to the relevant entries in the technical log required by regulation 10(2) and (3) of these Regulations;
(g) particulars of any overhauls, repairs, replacements and modifications relating to the propeller.

**THIRD SCHEDULE**

Regulation 39 and 40

**MAJOR REPAIRS AND MODIFICATION FORM**

<b>5.1 MAJOR REPAIR AND MODIFICATION</b> <b>(Airframe, Engine, Propeller or Appliance)</b>					United Republic of Tanzania	
					For TCAA Use Only	
					Office Identification	
INSTRUCTIONS: Print or type all entries. See the Civil Aviation (Airworthiness) Regulation 35 for instructions and disposition of this form.						
<b>1. Aircraft</b>	Make			Model		
	Serial Number			Nationality and Registration Mark		
<b>2. Owner</b>	Name (As shown on registration certificate)			Address (As shown on registration certificate)		
<b>3. For Authority Use Only</b>						
<b>4. Unit Identification</b>						
				<b>5. Type</b>		
Unit	Make	Model	Serial Number	Repair	Modification	
Airframe						
Engine						
Propeller						
<b>Appliance</b>	<b>Type</b>
